

Project Design Phase-II

Data Flow Diagram & User Stories

Date	25 June 2026
Team ID	SWTID-2026-5525
Project Name	Visualization Tool for Electric Vehicle Charge and Range Analysis
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: [\(Simplified\)](#)

Flow

1. User configures credentials for the Watson Natural Language Understanding service and starts the app.
2. User selects data file to process and load.
3. Apache Tika extracts text from the data file.
4. Extracted text is passed to Watson NLU for enrichment.
5. Enriched data is visualized in the UI using the D3.js library.

User Stories

User Type	Functional Requirement	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
EV Customer	Dashboard Visualization	USN-1	As a user, I can view EV analytics dashboard to understand vehicle insights	User can access interactive Tableau dashboard	High	Sprint-1
Data Analyst	Data Analysis	USN-2	As an analyst, I can analyze EV datasets using SQL queries	Insights can be generated from database	High	Sprint-1
EV Researcher	EV Comparison	USN-3	As a researcher, I can compare EV brands based on price, range, efficiency and performance	Comparison charts are displayed successfully	High	Sprint-1
Web User	Web Integration	USN-4	As a user, I can access Tableau dashboards through Flask web interface	Dashboard loads successfully in webpage	Medium	Sprint-2
Administrator	Data Management	USN-5	As an admin, I can update EV datasets for future analysis	New data can be added and processed	Medium	Sprint-2
